

## **Fujitsu's Slim New LIFEBOOK P8110 Offers Power and Mobility**

*New LIFEBOOK P product offers small footprint, unlimited connectivity and high security*

**Dubai, UAE, October 19, 2009** — Fujitsu is taking mobility and design to new heights with its latest LIFEBOOK P8110. With a slim design, more than seven hours of battery life, unlimited connectivity and high security, the LIFEBOOK P8110 is ideal for business travelers who need a compact and lightweight but powerful desktop substitute.

The LIFEBOOK P8110 has one of the smallest footprints in the 12-inch notebook market and its slim design and light weight of only 1.4 kilograms makes it the ideal machine for road warriors. The notebook has a robust but lightweight magnesium lid, with two stylish design concepts, glossy black or matt black. Along with a compact design, connectivity is another key element for mobile users. The LIFEBOOK P Series has unlimited connectivity thanks to built-in 3G/UMTS, WLAN and Bluetooth. Offering seamless switching between UMTS and WLAN, users are assured of a fast connection for wireless connectivity anywhere.

In addition, mobile users can be confident that their data is protected when traveling or working in public places, since the LIFEBOOK P8110 offers the highest security features. Data is protected from unauthorized access thanks to the Computrace® enabled BIOS, fingerprint sensor, optional Trusted Platform Module (TPM), and SmartCard controller.

The LIFEBOOK P8110 is designed from the ground up to save energy and offers the best energy efficiency. From the Intel® Core™2 Duo SU9600 processor to the optional Solid State Disk (SSD), its LED display, plus the Fujitsu EcoButton and Power Management system, the LIFEBOOK P8110 achieves an extremely long battery runtime of up to 7:15 hours, an important feature for mobile users.

Fujitsu also offers flexible configurations to meet users' exact needs – for example two different design options and palm rest along with options for 3G/UMTS modules, SSD drives and a port replicator for desktop use. A webcam is integrated into the LIFEBOOK P8110. The LIFEBOOK P8110 includes several new interfaces like HDMI for fast and easy transmission of audio and visual files.

The LIFEBOOK P8110 is available across the Middle East. Images are located online at: <http://mediaserver.ts.fujitsu.com/ms/go.cfm?folderid=11993&jumpfactor=6>
