

PRESS ANNOUNCEMENT

Fujitsu raises the stakes in virtualization and energy-efficiency at Gitex 2009 with its Dynamic Cube

Pages 3

Dubai, September 7, 2009

Fujitsu Technology Solutions will utilize its presence at Gitex 2009 to leverage its latest virtualization and energy-efficient solution in form of the Dynamic Cube. The company's new-generation PRIMERGY BX900 blade server system, also called Dynamic Cube, is a key foundation stone in the company's global market growth program for x86 servers. Fujitsu Technology Solutions will be present at OracleWorld in hall 5. Gitex takes place from October 18-22.

The company will also meet the influx of customers, industry specialists and channel partners keen to learn more about Fujitsu Technology Solutions mobility and enterprise solutions.

While mobility solutions such as notebooks continue to be a major focus area, Fujitsu Technology Solution will also focus on its entry-level sever for SMB's, the TX100 S1, and its FUTRO 100 thin clients among other solutions.

"Gitex has always presented us with the opportunity to meet our existing as well as potential customers and further promote our solutions. Our presence at OracleWorld this year will give us the opportunity to leverage our newer solutions such as the new-generation PRIMERGY BX900 that raises the stakes in virtualization and energy-efficiency, a must for organizations seeking to achieve cost savings and increasing IT systems' agility at the same time," said Chandan Mehta, Product Manager for Fujitsu Technology Solutions. "We are also addressing the concerns of SMB's with the TX100 S1 server. It is affordable and will allow small businesses to move away from using a PC in combination with an external hard drive for storage and upgrade to a proper business class server."

Fujitsu Technology Solutions will also be present at Gitex Shopper thorough its partners.
