

EU REACH regulation

SVHC Disclosure

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals, (EC) No 1907/2006) is the European Union's (EU) chemical substances regulatory framework entered into force on 1st of June 2007. Article 33 of the regulation requires to inform of the presence on Substances of Very High Concern (SVHC) as defined by REACH, when the concentration in an article is above 0.1 % weight by weight (w/w).

New SVHC reporting obligations in pursuant to the Waste Framework Directive (EU) 2018/851, the amendment to Directive 2008/98/EC, tightens the already existing information obligation in the supply chain according to Article 33(1) of the REACH regulation. Producers and suppliers that distribute articles with more than 0.1% by weight of substances of very high concern on the European market are now obliged to file detailed information on their products in the EU database SCIP (SCIP: substances of concern in articles as such or in complex objects (products)).

All FUJITSU products with components containing SVHC have been filed in the SCIP database since 5th January 2021 (ESPRIMO, CELSIUS, FUTRO, LIFEBOOK, STYLISTIC, PRIMERGY, ETERNUS, computer monitors, peripherals). Optional orderable components are notified as part to the referred FUJITSU product. The declared SVHCs of notified FUJITSU products will be verified regularly regarding to the latest version of the SVHC candidate list and necessary updates will be uploaded to the SCIP database. The SVHCs used in these products do not pose a safety risk to customers under normal use conditions.

FUJITSU provides for the SVHC disclosure of their entire portfolio the unique SCIP ID for searching in the SCIP database. [SCIP-Database - ECHA \(europa.eu\)](https://scip.echa.europa.eu/)
